

# LocalRec 2023

Proceedings of the 7th ACM SIGSPATIAL International Workshop on  
Location-based Recommendations, Geosocial Networks and Geoadvertising  
(LocalRec 2023)

Nov. 13rd, 2023, Hamburg, Germany

Editors:

Panagiotis Bouros, Johannes Gutenberg University Mainz, Germany

Tamraparni Dasu, Fairleigh Dickinson University, USA

Yaron Kanza, AT&T Labs – Research, USA

Matthias Renz, Christian-Albrechts-Universität zu Kiel, Germany

Dimitris Sacharidis, Université Libre de Bruxelles, Belgium

## FOREWORD

The fifth edition of the ACM SIGSPATIAL Workshop on Location-based Recommendations, Geosocial Networks and Geoadvertising (LocalRec 2023) was held as an online event, in conjunction with the 31st ACM SIGSPATIAL International Conference on Advances in Geographic Information Systems (ACM SIGSPATIAL 2023). We have compiled these proceedings containing the papers selected for presentation.

The amount of publicly available geo-referenced data has seen a dramatic explosion over the past few years. Human activity generates data and traces that are often transparently annotated with location and contextual information. At the same time, it has become easier than ever to collect and combine rich and diverse location information. For instance, in the context of geoadvertising, the use of geosocial data for targeted marketing is receiving significant attention from a wide spectrum of companies and organizations. With the advent of smartphones and online social networks, a multi-billion dollar industry that utilizes geosocial data for advertising and marketing has emerged. Geotagged social-media posts, GPS traces, data from cellular antennas and WiFi access points are used on a wide scale to directly access people for advertising, recommendations, marketing, and group purchases. Exploiting this torrent of geo-referenced data provides a tremendous potential to materially improve existing recommendation services and offer novel ones, with clear benefits in many domains, including social networks, marketing, and tourism. It also raises issues in the area of responsibility, accountability, transparency, fairness, adequacy (e.g., avoiding ads in improper places) and preventing misconduct.

Achieving the full potential of geo-referenced data requires new technologies to collect, store, analyze and use the data. It also raises issues in the area of responsibility, accountability, transparency, fairness, adequacy (e.g., avoiding ads in improper places) and preventing misconduct. This in turn means addressing many core challenges and combining ideas and techniques from various research communities, such as recommender systems, data management, geographic information systems, social network analytics and text mining. By bringing together researchers and practitioners from these communities, the LocalRec workshop aims to provide a unique forum for discussing in depth and collecting feedback about challenges, opportunities, novel techniques, and applications related to location-based recommendation, geosocial networks and geoadvertising.

LocalRec 2023 received a total of 12 research paper submissions, out of which 5 were accepted as full papers, 3 as short and 1 as demo. The program of the workshop is organized in 3 sessions and includes 2 invited talks. We hope that these proceedings will inspire new research ideas, and that you will enjoy reading them.

## ACKNOWLEDGEMENTS

We would like to thank the authors for publishing and presenting their papers. We would also like to thank the program committee whose reviewing efforts are important for ensuring the quality of the accepted papers. In addition, many thanks to our keynote speakers Kyriakos Mouratidis from Singapore Management University, and Mahmoud Sakr from Université Libre de Bruxelles, Belgium, who kindly accepted our invitations and will be sharing their research in LocalRec 2023.

## **ORGANIZERS**

### **ORGANIZING COMMITTEE:**

Panagiotis Bouros, Johannes Gutenberg University Mainz, Germany

Tamraparni Dasu, Fairleigh Dickinson University, USA

Yaron Kanza, AT&T Labs – Research, USA

Matthias Renz, Christian-Albrechts-Universität zu Kiel, Germany

Dimitris Sacharidis, Université Libre de Bruxelles, Belgium

### **PROGRAM COMMITTEE:**

Dirk Ahlers, Norwegian University of Science and Technology, Norway

Nikos Bikakis, Hellenic Mediterranean University & Athena Research Center, Greece

Matthias Braunhofer, Microsoft, Germany

Theodoros Chondrogiannis, University of Konstanz, Germany

Arie Croitoru, George Mason University, VA, USA

Giorgos Giannopoulos, Research Center "Athena", Greece

Haosheng Huang, Ghent University, Belgium

Vana Kalogeraki, Athens University of Economics and Business, Greece

Yuhao Kang, University of Wisconsin-Madison, WI, USA

Huan Lu, Roskilde University, Denmark

Bernd Ludwig, University of Regensburg, Germany

Amr Magdy, University of California, Riverside, CA, USA

Rajat Malik, AT&T, NY, USA

Kjetil Nørkvåg, Norwegian University of Science and Technology, Norway

Dimitris Papadias, The Hong Kong University of Science and Technology

Dimitrios Skoutas, Athena Research Center, Greece

Kostas Stefanidis, University of Tampere, Finland

Eleni Tzirita Zacharitou, IT University of Copenhagen, Denmark

Wolfgang Wörndl, Technical University of Munich, Germany

## SPONSORS

### CORPORATE SPONSORS

#### Platinum

#### Bronze

### PRIVATE SPONSORS

W. Randolph Franklin

## TABLE OF CONTENTS

<b>Opportunities for Spatial Database Research in the Context of Preference Queries</b>	1
<i>Kyriakos Mouratidis (Singapore Management University)</i>	
<b>Data-Driven Digital Mobility Twins</b>	4
<i>Mahmoud Sakr (Université Libre de Bruxelles)</i>	
<b>Analysis of the Distribution Characteristics and Influencing Factors of Advertising Billboards in Wuhan</b>	6
<i>Shaohua Wang (Aerospace Information Research Institute), Cheng Su (Aerospace Information Research Institute), Juanyuan Zhou (Lanzhou Jiaotong University), Xiao Li (Lanzhou Jiaotong University), Dachuan Xu (Lanzhou Jiaotong University), Wenyu Wie (Lanzhou Jiaotong University)</i>	
<b>Synthetic Geosocial Network Generation</b>	15
<i>Ketevan Gallagher (Thomas Jefferson High School for Science and Technology), Taylor Anderson (George Mason University), Andrew Crooks (University of Buffalo), Andreas Züfle (Emory University)</i>	
<b>Towards Generating Realistic Geosocial Networks</b>	25
<i>Abed Al Rhman Sarsour (Johannes Gutenberg University Mainz), Panagiotis Bouros (Johannes Gutenberg University Mainz), Theodoros Chondrogiannis (University of Konstanz)</i>	
<b>Geo-Awareness of Learnt Citations Prediction for Scientific Publications</b>	29
<i>Ce Li (Iowa State University), Will Postler (Iowa State University), Ian Johnson (Iowa State University), Paul Brinkmann (Iowa State University), Evan Gossling (Iowa State University), Bailey Gorlewski (Iowa State University), Goce Trajcevski (Iowa State University)</i>	
<b>BroadcastSTAND: Clustering Multimedia Sources of News</b>	33
<i>Jason Zhang (University of Maryland), Ai-Te Kuo (Auburn University), Nicole R. Schneider (University of Maryland), Jacob Peters, Hanan Samet (University of Maryland)</i>	
<b>Adaptable Data-Driven Geofences for Notifying Points of Interest Using Tourists' GPS Trajectories</b>	37
<i>Iori Sasaki, (Akita University), Masatoshi Arikawa (Akita University), Min Lu (Akita University), Ryo Sato (Akita University), Tomihiro Utsumi (Akita University)</i>	

<b>Harnessing Extracted Social Media Events for Personalized Travel</b>	44
<i>Mariam Orabi (University of Sharjah), Imad Afyouni (University of Sharjah), Zaher Al Aghbari (University of Sharjah)</i>	
<b>Rating Inference for Custom Trips from Enriched GPS Traces using Random Forests</b>	50
<i>Theodoros Chondrogiannis (University of Konstanz), Mouzhi Ge (Deggendorf Institute of Technology)</i>	
<b>Location-Aware Social Network Recommendation via Temporal Graph Networks</b>	58
<i>Ziyi Zhang (Texas A&amp;M University), Diya Li (Texas A&amp;M University), Zhenlei Song (Texas A&amp;M University), Nick Duffield (Texas A&amp;M University), Zhe Zhang (Texas A&amp;M University)</i>
